

# Alvin Duran

## Senior Full Stack & AI Integrations Engineer

Santo Domingo Este, Dominican Republic | Open to Remote Opportunities (US/EU)

[GMail](#) | [LinkedIn](#) | Available Immediately

## Professional Summary

Senior Full Stack Engineer with 10+ years of experience architecting enterprise web platforms, data pipelines, and internal tools for U.S. companies across SaaS, Fintech, E-commerce, and Manufacturing. Specialized in **Python (Django/Flask)**, **TypeScript/React**, cloud infrastructure (**AWS/Docker**), and modern **AI/LLM orchestration**. Proven track record of operationalizing AI solutions—utilizing **LangChain, LLMs, and automated pipelines** to transform raw unstructured data into high-value business logic.

## Technical Skills

- **AI, Automation & Data:** LangChain, LLMs (GPT/Claude Integration), Cursor, Attribute Normalization, Category Inference, Data Scraping, Asynchronous Data Pipelines
- **Backend Architectures:** Python (Django, Flask, Keg), Node.js (Koa, Express), C# (.NET/ASP.NET), Celery, REST APIs, GraphQL, OpenAPI 3, Alembic
- **Frontend Engineering:** TypeScript, JavaScript, React, Next.js, Vue.js, AngularJS, MobX, Storybook, Fomantic UI, Reactstrap, SCSS
- **Cloud & Databases:** AWS, Docker, PostgreSQL, MySQL, SQL Server, Elasticsearch
- **E-Commerce & Financial Integrations:** Shopify API, Stripe, Amazon SP-API Workflows, B2B Marketplaces
- **Testing & Quality Assurance:** Playwright, Cypress, Unit & Integration Testing

## AI & Core Technical Highlights

- **LLM-Powered Automation:** Integrated LangChain and LLM-driven tooling into core e-commerce backend pipelines to automate product categorization, unstructured attribute normalization, and intelligent category inference.
- **Scalable Data Pipelines:** Engineered high-throughput scraping and synchronization services handling high concurrency (500+ active enterprise users, bulk imports, and real-time inventory management).
- **AI-Assisted Workflow Engineering:** Early adopter of AI developer tooling (Cursor, AI agents) to accelerate feature delivery, refactoring, and test writing across complex codebases.

## Work Experience

### Senior Software Engineer

Sunco.com (U.S.) | Nov 2024 – Present

- Architected e-commerce backend integrations and internal orchestration platforms using **Django, Celery, Docker, AWS, and PostgreSQL**.

- Spearheaded **LLM-driven integrations using LangChain** for intelligent product categorization, automated attribute normalization, and category inference across multi-vendor catalogs.
- Built automated data pipelines synchronizing Amazon and Shopify ecosystems for high-volume bulk imports, real-time pricing updates, and operational reporting.
- Enhanced operational reliability by overhauling web scraping and import pipelines while implementing new **Shopify GraphQL APIs**.

## Senior Full Stack Engineer (Consultant)

**FullStack Labs (U.S.)** | *Feb 2023 – Nov 2024*

- **Bass Credit Union:** Engineered core frontend and backend services for a B2B lending portal using **React, TypeScript, Node.js (Koa), and OpenAPI 3**. Built modular UI components in **Storybook**.
- **Circular.co:** Developed B2B marketplace functionality connecting recycled plastics suppliers and buyers using **React/TypeScript** and **Python/Django**.
- **Studproof & Marketplace Clients:** Developed asynchronous backend services, integration suites (**Playwright, Cypress**), and Google Photos SDK workflows. Managed database migrations via **Alembic**.

## Full Stack Developer

**Level12 (U.S.)** | *Oct 2021 – Feb 2023*

- Built the core application engine for **How2Recycle**, managing complex product configuration, packaging sustainability logic, and custom XLSX reporting workflows.
- Developed resilient RESTful APIs using **Python/Keg (Flask)** and **PostgreSQL** paired with **React, MobX, and SCSS**.
- Implemented **Stripe** payment processing, role-based access control (RBAC), authentication mechanisms, and asynchronous notification queues.

## Full Stack Developer

**Scalable Path (U.S.)** | *Feb 2020 – Oct 2021*

- **LiquidCompass:** Managed scaling and maintenance for a U.S. nationwide job search platform using **PHP/Laravel, Elasticsearch, MySQL, and React**. Led frontend legacy migration from **AngularJS to React**.
- **VMS (Healthcare Staffing):** Developed a B2B order and contingent workforce management system featuring **Elasticsearch** full-text search and complex faceted filtering.

## Senior Software Developer

**Encore Repair Services, Inc.** | *Aug 2016 – Feb 2020*

- Built a mission-critical manufacturing execution system powering plant operations for 500+ concurrent employees.
- Engineered a low-latency bridge connecting hardware systems (scanners, printers, Windows/Apple devices) to a **Django REST API** using **C# (MVVM), MySQL, and SQL Server**.

## Education

- **Bachelor of Science in Computer Science** — Instituto Tecnológico de Santo Domingo (2014 – 2018)
- **Associate's Degree in Software Engineering** — ITLA (2010 – 2012)

## Certifications & Languages

- **Certifications:** Oracle Certified Associate, Java SE 7 Programmer
- **Languages:** English (Professional Working Proficiency), Spanish (Native)
